<u>Persona 1: The Beginner</u>

“Motivated Mia”

Age: 24
Occupation: Graduate student
Experience Level: New to strength training

Goals:

- Mia wants to build confidence in the gym and understand whether she is improving. She wants simple, clear feedback that reassures her she is on the right track.

Frustrations:

- She feels overwhelmed by numbers and doesn’t know how to interpret her progress. She often wonders whether she should increase weight or change exercises.

Motivations:

- Mia is motivated by visible progress, positive reinforcement, and easy-to-understand visuals.

How FitnessProgressor Helps:

- The app provides Mia with clear charts, weekly summaries, and simple recommendations that remove the guesswork from her training.

<u>Persona 2: The Intermediate Lifter</u>

“Progress-Driven Daniel”

Age: 31
Occupation: IT professional
Experience Level: 3–5 years of consistent lifting

Goals:

- Daniel wants to optimize his performance, break plateaus, and track long-term trends in his training.

Frustrations:

- He has years of data but no easy way to analyze it. He struggles to identify patterns or determine when to increase intensity.

Motivations:

- Daniel is motivated by measurable improvement, detailed analytics, and performance forecasting.

How FitnessProgressor Helps:

- The app detects plateaus, highlights trends, and forecasts goal timelines, giving Daniel the insight he needs to adjust his training intelligently.

<u>Persona 3: The Busy Professional</u>

“Efficient Emily”

Age: 38
Occupation: Corporate manager
Experience Level: Moderate, but time-constrained

Goals:

- Emily wants to stay consistent with her workouts and quickly understand whether she is improving.

Frustrations:

- She doesn’t have time to manually review logs or analyze her performance. She wants insights delivered quickly and clearly.

Motivations:

- Efficiency, clarity, and actionable recommendations.

How FitnessProgressor Helps:

- The app provides concise weekly summaries and personalized recommendations that fit into her busy schedule.
